

Nebusiwe Wellness Centre Website

Summary of Changes Made

Overview

The website originally consisted of five plain HTML pages (Home, About, Services, Gallery and Contact) with no external stylesheet and only inline styling. The changes below cover two rounds of work: (1) creating a CSS stylesheet and linking it to every page, and (2) adding a new Enquiries page with a contact form.

1. New Stylesheet (CSS/style.css)

A new, beginner-friendly stylesheet was created at CSS/style.css and linked into every page. It replaces the inline styling that was scattered across the HTML files.

- A CSS reset (margin, padding, box-sizing) so all browsers start from the same clean baseline.
- A calm wellness colour palette: white and coral headers/footer, chocolate page background.
- A flexbox header that lines up the logo and navigation menu, with hover highlights on nav links.
- Consistent spacing and colour for headings, paragraphs and lists in the main content area.
- Styling for the homepage video, gallery images (rounded corners, shadow) and the embedded Google Map.
- A coral footer bar, styled consistently across all pages.
- A responsive media query so the header stacks vertically on small (mobile) screens.

Changes to the existing HTML files

- Added a `<link rel="stylesheet" href="CSS/style.css">` tag inside the `<head>` of home.html, about.html, services.html, gallery.html and contact.html.
- Removed the inline `style="background-color: chocolate;"` from the `<body>` tag on every page, since the background colour is now controlled by the stylesheet.

2. New Enquiries Page (enquiries.html)

A new page was created so visitors can send an enquiry directly from the website, in addition to the existing Contact page details.

- Same header, logo and footer layout as the rest of the site, for visual consistency.
- A form with fields for Full Name, Email Address, Phone Number, a Service drop-down (matching the list on the Services page) and a Message box.
- The form submits using a `mailto:` action, which opens the visitor's email application with the enquiry details pre-filled, addressed to `busiwane@gmail.com`. This avoids the need for a backend server, but does rely on the visitor having an email client configured on their device.

- New form styling (class .enquiry-form) was added to CSS/style.css: labelled fields stacked vertically, green focus outline on the active field, and a green submit button with a hover effect.

Navigation updates

An "Enquiries" link was added to the navigation menu on every page (Home, About, Services, Gallery, Enquiries and Contact), placed between Gallery and Contact, so the new page is reachable from anywhere on the site.

3. File Summary

File	Status	Description
CSS/style.css	New	Full stylesheet for the site, including the enquiry form styling.
enquiries.html	New	New Enquiries page with contact form.
home.html	Updated	Linked stylesheet; removed inline background; added nav link.
about.html	Updated	Linked stylesheet; removed inline background; added nav link.
services.html	Updated	Linked stylesheet; removed inline background; added nav link.
gallery.html	Updated	Linked stylesheet; removed inline background; added nav link.
contact.html	Updated	Linked stylesheet; removed inline background; added nav link.
